REPORT NO. 364

ANALYSIS OF THE MICHIGAN CREEL CENSUS FOR THE YEAR 1934<sup>1</sup>

The data given in the accompanying tables were compiled by N.Y.A. help under the supervision of Mrs. Carl L. Hubbs. The information was collected almost entirely by the Michigan conservation officers.

Data for the intensive survey on several lakes taken by the Michigan E.C.W. were not included. Since these data from the intensive census generally were much more extensive for one lake in a county than were all data for the county collected for the general census, inclusion of the intensive census appeared unwise.

In all cases each table in this report corresponds to the table of the same number in Report 282. In a number of the tables the data for 1934 are compared with the data for 1933 and average data for the 1928-1932 period.

The number of hours of fishing checked in 1934 (Table 1) was considerably higher than the number for 1933 and was almost equivalent to the average for the 1928-1932 period. The relation between records for trout and non-trout waters differed decidedly for 1933 and 1934. The total hours represented were higher in 1934 than in 1933, but the number of hours of trout fishing recorded were lower in 1934. The fish catch listed for 1934 was very much higher than the catch for the previous year, suggesting that the 1934 fishing was decidedly the better (provided the sampling was representative both years).

The figures in Table 1 show an increase in the number of Brown Trout taken, even though the hours of trout fishing recorded were fewer. There is an indication that some species fluctuated decidedly in the catch while others remained relatively the same. Most of the common warm-water species were recorded in greater abundance in 1934 than in 1933.

<sup>1</sup> For a thorough understanding of this report see Report No. 238.

Table 1 shows the approximate number of census cards and sheets obtained from each county. It is obvious that the number of cards from each county is not always in proportion to the extent of fishing.

Table 2 shows the percentage of total reported catch in all waters of each species caught in each of the three areas. Of the 92,285 fish reported, 69.5% were from below Town 20, 23.9% from the Lower Peninsula north of Town 20 and 7.0% from the Upper Peninsula. Rainbow Trout were approximately equally represented in the two areas in the Lower Peninsula; Brown Trout constituted almost three-fourths of the trout taken below Town 20 and only 3.9% of those taken in the Upper Peninsula. Brook Trout were best represented in the trout catch in the Upper Peninsula and poorest below Town 20. A comparison of the figures for 1933 and 1934 shows a similarity in the abundance of each species with respect to the abundance of the other two kinds of trout. In the Upper Peninsula only 4.0% of the records were for non-trout waters, while 73.3% of the records below Town 20 were for non-trout waters. The areas apparently differ widely with respect to the relative abundance of trout and non-trout waters.

Table 2 shows, for each species, the relative abundance of that species in catches reported for each of the three regions. These interesting data show that there is a decided difference between the species common to the Upper Peninsula and those common to the area below Town 20.

Table 3 (a, b, c, d) shows, for each county, the total reported catch by species. There is reason to believe that the reports for some counties were not representative for the fishing in these counties. The figures for any one county are therefore probably not as reliable as the figures for each of the three areas as a whole.

It will be noted in Table 4 that trout constituted 85% of all fish reported; most of the trout were Brook Trout. Bluegills constituted 41.3% of all fish reported caught. Perch (18.7%) ranked next to Bluegills in percentage caught. There is little reason to doubt that the Bluegill ranks first in the state in number of fish caught, even though this species appears to be taken relatively little in the Upper Peninsula.

Table 5 shows the relative abundance of Brook, Brown and Rainbow Trout recorded for each county. In general, these figures should not be considered reliable, because of the scarcity of data for many of the counties and because of the probability that figures for some counties were not representative. In Table 6 the computations of the relative abundance of each of the three species of trout are summarized. Table 7 shows the relative abundance of the more important warm-water species in each of the three districts and in the state as a whole. Table 8 gives similar data (by counties) for all fish.

The percentage of bluegills in the catch (by counties) for 1934, 1933, and average for 1928-1935 is shown in Table 9. The reliability of these data depends on the number of records and on the degree to which the records were representative.

Table 10 shows the catch per hour for all fish, by counties. It will be noted that fishing improved decidedly in 1934 over 1933 in all three districts, also that the 1934 figures (for districts) were invariably higher than average figures for the 1928-1932 period. In the Lower Peninsula below Town 20, the per hour catch in 1934 was 1.85 fish as compared with 1.12 for the previous year; above Town 20 the catch was 1.31 per hour as compared with .83 for 1933. Upper Peninsula fishing was almost identical with fishing above Town 20 in the Lower Peninsula and showed a similar increase. Had time been available to determine the length of the fish, the figures probably would indicate that the fish in the northern part of the state had a larger average size, making up somewhat for the smaller catch per hour in northern Michigan as compared with the catch per hour in southern Michigan. The fish caught in the southern part of the state were dominantly Bluegills which are of a relatively small average size, while the fish in northern Michigan include a greater percentage of fish representing major game species. In the state as a whole, the 1934 fishing must be regarded as having been exceptionally good.

Table 11 shows, by counties, the trout catch per hour. For many counties these data are not reliable because of scarcity of records.

Table 12 and 13 show, by counties, the catch per hour for non-trout waters and for Bluegills respectively. Table 14 shows for each district and for the state as a whole

the catch per hour of various species and combinations of species.

General Comments

It appears desirable to repeat the comment made in the report for 1933: "In order to obtain the fullest benefit, it is imperative that this creel census be continued over a long period of time and that there be more adequate and uniform yearly returns from all counties."

The records obtained in 1934 were considerably greater than those obtained for 1933.

The census is at present entering its ninth year. It should be possible, in the relatively near future, to determine certain trends in the fishing and to obtain, by a comparision of fishing over this period, some interesting and helpful information. Much information not indicated in the reports to date (information on average length of fish, etc.) is still available on the records. Lack of time and funds have prevented the full utilization of the material and the compilation of data not given here.

Data for the 1935 census will be more complete due to the use of tabulating and sorting equipment previously not available.

Several types of blanks are now in use. It is considered advisable that the cards in general use in the past be entirely replaced by the more complete white sheets which are now available.

It is anticipated that a report covering data for all census work since 1928 will be prepared at some later date.

	2. Lower Peninsula north of T. 20	22,077	23.92
	3. Upper Peninsula	6,431	6.97
	4. Entire state	92,285	100.00

TABLE 5a. RELATIVE ABUNDANCE OF BROOK, BROWN AND RAINBOW TROUT BY COUNTIES OF LOWER PENINSULA SOUTH OF TOWNLINE 20

Exclusive of the few trout caught in essentially non-trout waters. The figures represent the percentage of the total catch of these three species for each county. 0 indicates that no trout of this species was reported, though some trout fishing was reported for the county. 100 indicates that only this species of trout was reported from the county. - (dash) indicates that no trout fishing at all was reported.

County	Total	Brook Trout	Brown Trout	Rainbow Trout

Totals	1. Lower Peninsula S. of T. 20	2167	100.0
	2. Lower Peninsula N. of T. 20	2830	100.0
	3. Upper Peninsula	2921	99.9
	4. Entire state	7918	100.0

TABLE 7a. SUMMARY OF COMPUTATIONS ON RELATIVE ABUNDANCE OF THE MAIN WARM-WATER FISHES WITHIN EACH REGION, FIRST PART: MORE IMPORTANT SPECIES.

The figures represent the percentage of the total catch of fish in non-trout waters, for each region and year.

Species	Region	1934	1933	Average 1928-1932
Small-mouth Bass	1. Lower Peninsula S. of T. 20	1.2	1.7	1.2
	2. Lower Peninsula N. of T. 20	2.6	0.7	3.3
	3. Upper Peninsula	7.1	5.5	2.9
	4. Entire state	1.8	1.5	2.0
Large-mouth Bass	1. Lower Peninsula S. of T. 20	3.8	4.0	4.7
	2. Lower Peninsula N. of T. 20	1.9	0.9	1.9
	3. Upper Peninsula	6.0	5.3	2.9
	4. Entire state	3.4	3.6	3.7
Blue-gill	1. Lower Peninsula S. of T. 20	56.8	57.4	42.2
	2. Lower Peninsula N. of T. 20	15.3	2.0	11.0
	3. Upper Peninsula	6.7	3.4	1.7
	4. Entire state	45.4	44.0	29.5
Common Sunfish	1. Lower Peninsula S. of T. 20	5.3	4.1	6.0
	2. Lower Peninsula N. of T. 20	6.0	4.2	3.3
	3. Upper Peninsula	0.7	2.2	0.6
	4. Entire state	5.3	4.0	4.7
Rock Bass	1. Lower Peninsula S. of T. 20	3.5	3.1	4.7
	2. Lower Peninsula N. of T. 20	9.2	8.9	9.4
	3. Upper Peninsula	5.9	4.4	4.1
	4. Entire state	4.9	4.2	6.0
Calico Bass	1. Lower Peninsula S. of T. 20	5.8	4.8	5.4
	2. Lower Peninsula N. of T. 20	3.2	0.1	0.9
	3. Upper Peninsula	0.2	0.3	0.2
	4. Entire state	5.0	3.7	3.6
Perch	1. Lower Peninsula S. of T. 20	14.4	9.1	22.8
	2. Lower Peninsula N. of T. 20	37.0	35.3	30.3
	3. Upper Peninsula	37.5	34.7	47.8
	4. Entire state	20.5	14.7	27.2
Walleye	1. Lower Peninsula S. of T. 20	2.4	2.5	0.7
	2. Lower Peninsula N. of T. 20	4.5	5.5	5.6
	3. Upper Peninsula	7.0	5.2	9.6
	4. Entire state	3.1	3.2	2.9
Northern Pike	1. Lower Peninsula S. of T. 20	1.8	1.3	2.5
	2. Lower Peninsula N. of T. 20	13.7	31.8	24.3
	3. Upper Peninsula	12.7	12.4	15.4
	4. Entire state	4.9	7.2	10.0
Bull-heads	1. Lower Peninsula S. of T. 20	3.3	7.5	6.3
	2. Lower Peninsula N. of T. 20	1.9	2.0	5.0
	3. Upper Peninsula	0.6	8.0	3.3
	4. Entire state	2.9	6.6	5.6

TABLE 7b. SUMMARY OF COMPUTATIONS ON RELATIVE ABUNDANCE OF THE WARM-WATER FISHES  
WITHIN EACH REGION, SECOND PART: FOR LARGER GAME-FISHES VS. PAN-FISHES, AND  
FOR MINOR SPECIES

For further explanation see Table 7a.

Species	Region	1934	1933	Average	1928-1932
Larger game-fishes <sup>1</sup>	1. Lower Peninsula S. of T. 20	9.2	9.5	9.1	
	2. Lower Peninsula N. of T. 20	22.7	38.9	35.1	
	3. Upper Peninsula	32.8	28.4	30.8	
	4. Entire state	13.2	15.9	18.6	
Pan-fishes <sup>2</sup>	1. Lower Peninsula S. of T. 20	85.8	77.5	81.1	
	2. Lower Peninsula N. of T. 20	70.7	50.5	54.5	
	3. Upper Peninsula	51.0	45.0	54.3	
	4. Entire state	81.1	70.6	71.1	
Ratio: pan-fish to game-fishes	1. Lower Peninsula S. of T. 20	9.3	8.2	8.9	
	2. Lower Peninsula N. of T. 20	3.1	1.3	1.6	
	3. Upper Peninsula	1.6	1.6	1.8	
	4. Entire state	6.1	4.4	5.8	
Smelt	1. Lower Peninsula S. of T. 20	0	0	0	
	2. Lower Peninsula N. of T. 20	1.4	8.3	2.5	
	3. Upper Peninsula	0	0.3	0	
	4. Entire state	0.3	1.4	0.7	
Cisco & White-fish	1. Lower Peninsula S. of T. 20	tr.	0.0	tr.	
	2. Lower Peninsula N. of T. 20	1.2	tr.	0.6	
	3. Upper Peninsula	0.0	7.7	2.5	
	4. Entire state	0.3	0.6	0.4	
Mullets, Suckers, and Red-horses	1. Lower Peninsula S. of T. 20	0.8	1.4	1.6	
	2. Lower Peninsula N. of T. 20	1.4	tr.	1.4	
	3. Upper Peninsula	14.5	7.2	8.1	
	4. Entire state	1.5	1.6	2.1	
Carp	1. Lower Peninsula S. of T. 20	0.5	3.3	1.1	
	2. Lower Peninsula N. of T. 20	0.0	0.0	0.1	
	3. Upper Peninsula	0.0	0.0	0.7	
	4. Entire state	0.4	2.5	0.8	
Other Species and Un-named	1. Lower Peninsula S. of T. 20	0.3	0.6	0.7	
	2. Lower Peninsula N. of T. 20	0.7	0.2	0.4	
	3. Upper Peninsula	1.1	3.3	0.3	
	4. Entire state	0.4	0.6	0.6	

<sup>1</sup> Four important species (small-mouth and large-mouth bass, walleyes and northern pike) added together. Other game-fishes, as the muskallunge, lake trout, etc., are caught in proportionately immaterial numbers.

<sup>2</sup> Five species, (bluegill, common sunfish, rock bass, black crappie, and perch) added together. Bullheads, smelt and ciscoes are excluded. Other species, coming under the term "pan-fish" are caught in immaterial numbers.

TABLE 8a. RELATIVE ABUNDANCE OF THE MAIN WARM-WATER FISHES, FOR 1934, IN COUNTIES OF THE LOWER PENINSULA SOUTH OF TOWNLINE 20.

The figures represent the percentage of the total reported catch of fish in non-trout waters, for each county, which total is given in the first column. Unless this total amounts to several hundred, the relative abundance figures are of low reliability. Tr. = trace, less than 0.05%. 0 indicates that no fish of the given species was reported for the county, although some fishing was reported for the county.

County	Total catch, non- trout waters	BLACK BASS			Common Sunfish	Rock Bass	Calico Bass	Perch	Walleye	Grass Fike	Bull- heads	Catfish	Carp	Common Sucker
		Small mouth	Large- mouth	Bluegill

TABLE 14a. SUMMARY OF COMPUTATIONS OF TOTAL FISH CATCH PER HOUR, FIRST PART, FOR ALL SPECIES, FOR TROUT AND FOR PROPAGATED VS. NON-PROPAGATED FISH.

Species	Waters	Region	Average	Average	Average
			1934	1933	1928-1932
All species	All waters	1. Lower Peninsula S. of T. 20	1.85	1.40	1.33
		2. Lower Peninsula N. of T. 20	1.31	0.83	0.72
		3. Upper Peninsula	1.32	0.82	1.02
		4. Entire state	1.64	1.12	1.00
All species	Non-trout waters	1. Lower Peninsula S. of T. 20	1.96	1.54	1.35
		2. Lower Peninsula N. of T. 20	1.46	0.76	0.60
		3. Upper Peninsula	1.61	1.03	1.12
		4. Entire state	1.80	1.26	0.87
Brook, Brown, and Rainbow Trout	Trout Waters	1. Lower Peninsula S. of T. 20	0.66	0.67	1.15
		2. Lower Peninsula N. of T. 20	0.72	1.03	1.08
		3. Upper Peninsula	1.04	0.69	0.97
		4. Entire state	0.79	0.76	1.04
Brook Trout	Trout Waters	1. Lower Peninsula S. of T. 20	0.38	0.49	0.82
		2. Lower Peninsula N. of T. 20	0.54	0.85	0.94
		3. Upper Peninsula	0.96	0.62	0.93
		4. Entire state	0.61	0.64	0.92
Brown Trout	Trout Waters	1. Lower Peninsula S. of T. 20	0.12	0.08	0.08
		2. Lower Peninsula N. of T. 20	.035	0.04	0.02
		3. Upper Peninsula	.008	tr.	tr.
		4. Entire state	.055	0.03	0.02
Rainbow Trout	Trout Waters	1. Lower Peninsula S. of T. 20	0.16	0.10	0.25
		2. Lower Peninsula N. of T. 20	0.15	0.14	0.12
		3. Upper Peninsula	.069	0.07	0.04
		4. Entire state	0.13	0.09	0.11
5 Propagated Lake Fishes <sup>1</sup>	Non-trout Waters	1. Lower Peninsula S. of T. 20	1.55	1.15	0.97
		2. Lower Peninsula N. of T. 20	0.90	0.34	0.31
		3. Upper Peninsula	1.04	0.58	0.73
		4. Entire state	1.35	0.85	0.63
5 Non-propagated lake fishes <sup>2</sup>	Non-trout waters	1. Lower Peninsula S. of T. 20	0.38	0.31	0.33
		2. Lower Peninsula N. of T. 20	0.49	0.36	0.27
		3. Upper Peninsula	0.32	0.28	0.27
		4. Entire state	0.41	0.32	0.30
Ratio, 5 propagated to 5 non-propagated fishes		1. Lower Peninsula S. of T. 20	4.07	3.71	2.94
		2. Lower Peninsula N. of T. 20	1.85	0.94	1.15
		3. Upper Peninsula	3.27	2.07	2.70
		4. Entire state	3.28	2.66	2.10

<sup>1</sup> Large-mouth and Small-mouth Bass, Bluegills, Perch and Walleyes.

<sup>2</sup> Common Sunfish, Rock Bass, Black Crappie, Northern Pike and Bullheads.

TABLE 14b. SUMMARY OF COMPUTATIONS OF TOTAL FISH CATCH PER HOUR, SECOND PART,  
FOR MORE IMPORTANT SPECIES IN NON-TROUT WATERS

Species	Region	Average	Average	Average
		1934	1933	1928-1932
Small-mouth Bass	1. Lower Peninsula S. of T. 20	0.02	0.02	0.02
	2. Lower Peninsula N. of T. 20	0.04	tr.	0.02
	3. Upper Peninsula	0.12	0.06	0.03
	4. Entire state	0.03	0.02	0.02
Large-mouth Bass	1. Lower Peninsula S. of T. 20	0.07	0.06	0.06
	2. Lower Peninsula N. of T. 20	0.03	tr.	0.01
	3. Upper Peninsula	0.10	0.05	0.03
	4. Entire state	0.06	0.04	0.03
Bluegill	1. Lower Peninsula S. of T. 20	1.12	0.89	0.57
	2. Lower Peninsula N. of T. 20	0.22	0.02	0.07
	3. Upper Peninsula	0.11	0.04	0.02
	4. Entire state	0.82	0.55	0.29
Common Sunfish	1. Lower Peninsula S. of T. 20	0.10	0.07	0.08
	2. Lower Peninsula N. of T. 20	0.09	0.03	0.02
