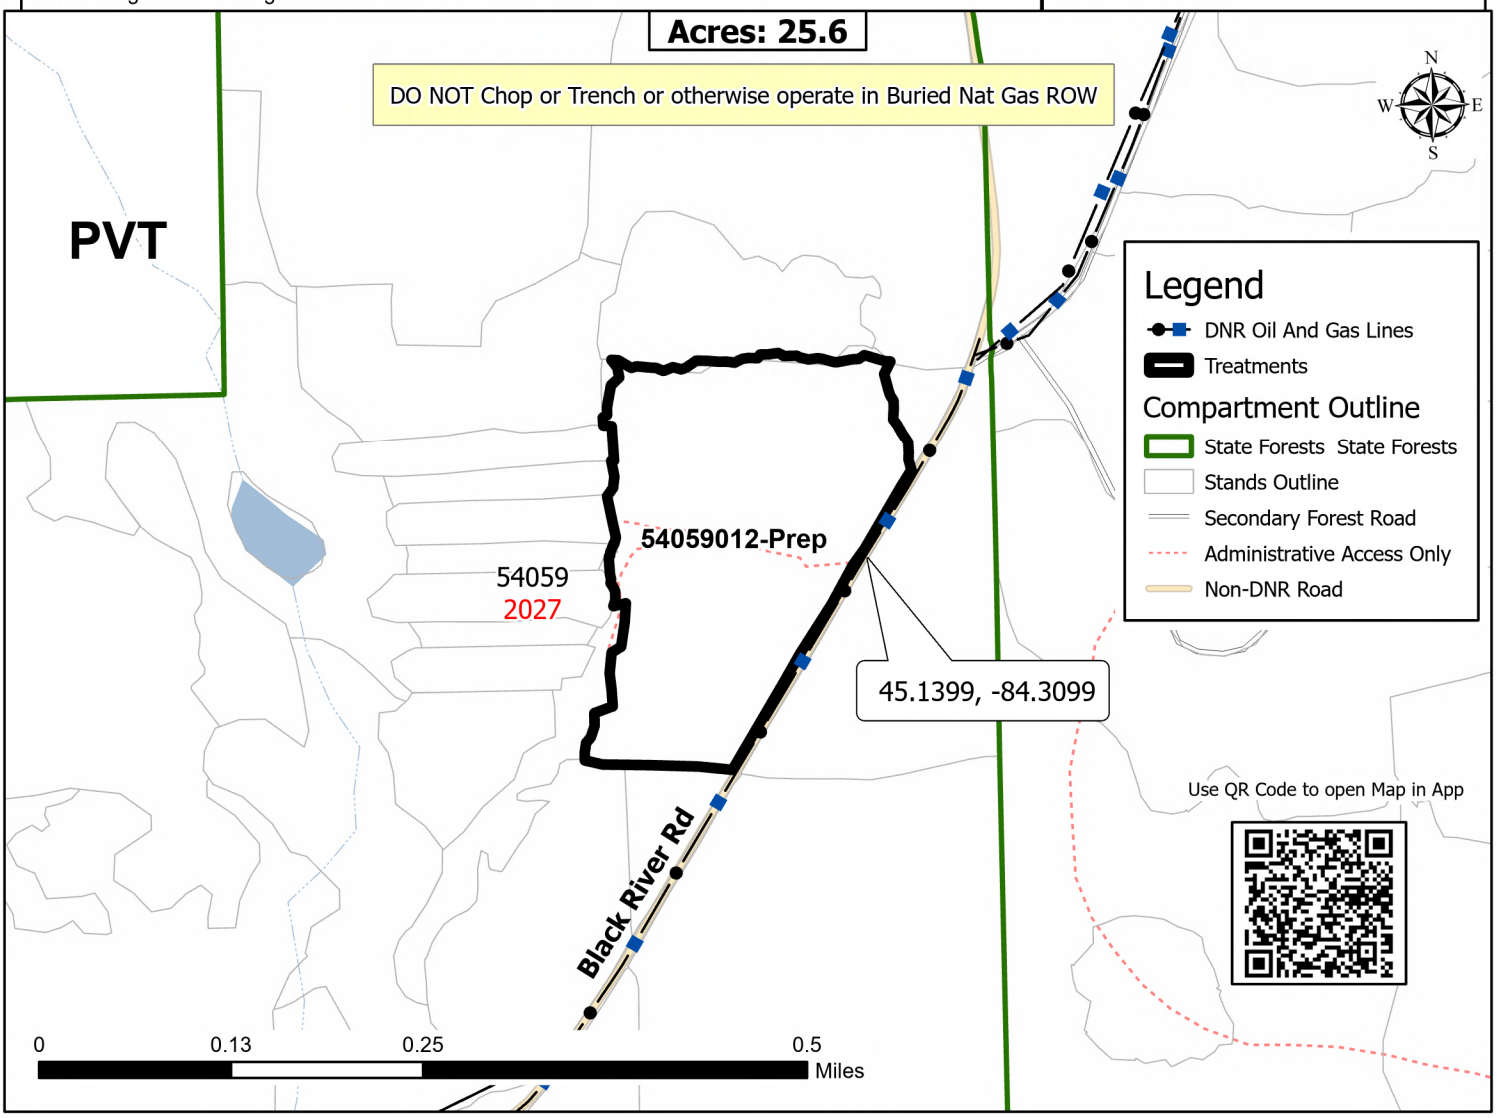
Acceptable Regen: well stocked RP
Rx Specs:
Other Comments:

Approved Methods: Chop, Trench, and Plant to RP at standard spacing per TMS specifications.
Additional Treatments may include herbicide spraying, and pre-commercial thinning.

MIFI Start Date:

Implementation Notes

Comments: Pipelines and electric cables are buried along the County roads and wellsite access roads. These are to be excluded from chopping, and trenching operations. The RP replant units within the sale were harvested 3 years ago. Site may need to be chopped before trenching.


Keep the temporary admin access road through the stand open, untrenched, and unplanted for maintaining timber management access to the stands to the west.
