

ATLANTA FOREST MANAGEMENT UNIT
COMPARTMENT REVIEW PRESENTATION
COMPARTMENT 169 ENTRY YEAR: 2013

Compartment Acreage: 1485 County: Cheboygan

Revision Date: October 27, 2011

Stand Examiner: Barber

Legal Description: T37N, R1E, Sec. 8, 17 & 18

RMU (if applicable): Hammond Bay Lake Plain MA

Management Goals: Protection of SCA's and patience while waiting for stands in south of compartment to put on growth.

Soil and Topography: Rather flat with over 40 % lowland types. Uplands are PArVHa/PArVVb, for the most part.

Ownership Patterns, Development, and Land Use in and Around the Compartment: Mostly other state land to the northwest and southeast, and private forest land to the northeast and southwest. A commercial cranberry operation is to the immediate east of the compartment. The City of Cheboygan is about 5 miles to the northwest.

Unique, Natural Features (include only non-site specific and non-sensitive information): One or more occurrences have been reported for this compartment.

Archeological, Historical, and Cultural Features (include only non-site specific and non-sensitive information): None Reported.

Special Management Designations or Considerations: Duck Lake/Mud Lake ERA and Duck Lake/Mud Lake Natural Area.

Watershed and Fisheries Considerations: A commercial cranberry operation nearly adjoins the Duck Lake/Mud Lake Natural Area. There may be a potential for impacts, such as from water withdrawals.

Wildlife Habitat Considerations: *(This space for sale or lease. Call (989)785-4251 ext. 5230.)*

Mineral Resource and Development Concerns and/or Restrictions: Surface sediments consist of lacustrine (lake) sand and gravel. The glacial drift thickness varies between 400 and 600 feet. Beneath the glacial drift is the Devonian Detroit River Group, used for dolomite/stone. The nearest gravel pit is located adjacent to the compartment to the north in Section 5 and there appears to be gravel potential. This area has had no drilling for oil and gas. Oil and gas producing Guelph (Niagaran) reefs are located 22 miles to the southeast. All of the State land is leased for oil and gas development.

Vehicle Access: Roads to be closed are shown on the compartment map as closed or abandoned.

Survey Needs: None.

Recreational Facilities and Opportunities: ORV trails, ORV routes, and a snowmobile trail all run through the compartment.

Fire Protection: Adequate.

Additional Compartment Information:

- **The following 5 reports from the Operations Inventory System (OIPC) are attached:**
 - ◆ **Cover Type by Age Class**
 - ◆ **Cover Type by Management Objective**
 - ◆ **Compartment Volume Summary**
 - ◆ **Proposed Treatments – No Limiting Factors**

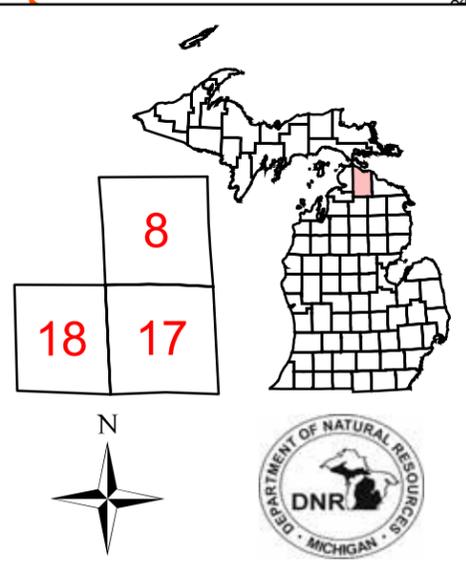

◆ **Proposed Treatments – With Limiting Factors**

➤ **The following information is displayed, where pertinent, on the attached compartment maps:**

- ◆ **Base feature information, stand numbers, cover types**
- ◆ **Proposed treatments**
- ◆ **Proposed road access system**
- ◆ **Suggested potential old growth**

31	6225 - Bog	2.3	N/A	Unspecified	
34	3302 - Low Density Conifer Trees	38.0	Natural Regen	Red Pine	just harvested. red pine seed tree.
35	330 - Low-Density Trees	14.9	N/A	Unspecified	
36	330 - Low-Density Trees	1.5	N/A	Unspecified	

7 – PROPOSED SPECIAL CONSERVATION AREA* (SCA) DETAILS

* This is a partial list of SCAs for this compartment. Not included are those areas identified under other Department initiatives (Natural Rivers, Deer Wintering Areas, etc.). Those will be identified in separate, future map and report products.

Stand	SCA Type	SCA Name	Acres	Comments
-------	----------	----------	-------	----------

8 – DEDICATED CONSERVATION AREA DETAILS

* This is a list of Dedicated Biodiversity Areas for this compartment along with a 1/4 mile buffer surrounding the compartment. Refer to Dedicated Conservation Area Map for areas that the below listed Conservation Areas are located.

ERA = Ecological Reference Area
HCVA = High Conservation Value Area
SCA = Special Conservation Area

Conservation Area	Type	Description
ERA	Ecological Reference Areas	Ecological Reference Areas (ERAs) are high quality examples of natural communities that have been identified as Element Occurrences (EOs) by the Michigan Natural Features Inventory (MNFI) within the context of their natural community classification system. Element Occurrences with viability ranks of A (Excellent) or B (Good) and a Global (G) or State (S) element (rarity) ranking of endangered (1), threatened (2), or rare (3) serve as an initial base of ERAs. They may be located upon any ownership in the State. The system is comprised of individual or associations of natural community types that are managed for restoration and maintenance of natural ecological processes and values. The public may submit recommendations for lands as ERAs using the DNR Conservation Area Recommendation Form.
SCA	Non-Dedicated Natural Areas and National Natural Landmarks	This category is comprised of those Natural, Wilderness and Wild Areas that have been nominated or proposed for legal dedication, but for which legal dedication by legislature has not occurred. The nomination process is defined by Part 351, Wilderness and Natural Areas, of the Natural Resources and Environmental Protection Act, 1994 PA 451. The program is administered by the DNR. Nominations require the submittal of a Natural Areas Nomination Packet to the DNR. This is an active program, with proposed sites in various stages of review. Final dedication of nominated Natural, Wilderness and Wild Areas is accomplished through legislative action.
