Part B: Surveyor's Report on Perpetuation, Restoration, Reestablishment, or Monumentation of Corner

a.) The original post and accessories were not recovered. At a position consistent with the original record, I found a 2"x2" heavy angle iron, firmly set, projecting 2' above ground, with nearby trees blazed and metal location poster indicating the corner. I accepted the angle iron as the best available evidence of the position of the original corner.

b.) Found the 1953 monument at record bearing and distance from the 1953 witnesses. The Sugar SW is in good condition with overgrown blazes and location poster. The Sugar NE is dead and down. The top portion of the monument is bent, but the bottom section is straight and plumb. Accepted the position as the best available evidence of the position of the original corner. Removed the 1953 monument and replaced it with a new monument as described below.
