conformance with the rules of the Medigan Board of Land Surveyers or by a Decree of a Court of Land, stabilished, restabilished, removered, the recovered, but we expected below. NOTE: Not more that 4 corners, all in the same town and range, may be recorded on this certificate. A Description of original monument and accessories and/or subtequent restoration: Line Common to P.C. 27 and P.C. 227 The eastern line of P.C. 27 was originally surveyed as one tract of land in 1810. The western line of P.C. 27 was originally surveyed as one tract of land in 1810. The western line of P.C. 27 was originally surveyed as one tract of land in 1810. The western line of P.C. 27 was originally surveyed as one tract of land in 1810. The western line of P.C. 27 was originally surveyed as one tract of land in 1810. The western line of P.C. 27 was originally surveyed as one tract of land in 1810. The western line of P.C. 27 was originally surveyed as one tract of land in 1810. The western line of P.C. 27 was originally surveyed as one tract of land in 1810. The western line of property of the land in 1810. The western line of property land in 1810. The western line of property land in 1810. The western line of this line. The city of Detroit Survey Section has assembled and maintained their "Cartographic Maps" from record plat data and field work. These maps have been relied upon for a great number of years and are considered the best assembled collection of written evidence available. To the best of my knowledge, there has never been any subsequent restoration of this line. Excepting the plats which we done long ago. B. Description of corner evidence found and/or method applied in restoring or reestablishing corner. Line Common to P.C. 27 and P.C. 227 A complete analysis of this line from its southern beginnings at the Detroit River to its northern terminus has been field measured by Spalding Defector Associates, locating building hills below the property of the land. The property was also associates, locating building hills	manual of survey instructions of the	he United States Department of the Interior,	Bureau of Land Management or by lines 3, 4 and 5 above were in	8 18 17 15 15 15 16 14 1
A Description of original monument and accessories and/or subsequent restoration: Line Common to P.C. 27 and P.C. 227 The eastern line of P.C. 227 was originally surveyed as one tract of land in 1810. The western line of P.C. 27 was originally surveyed as two separate tracts of land, the first the year 1810 and the second most likely in 1829 (see research dessier for sketch and notes). Posts were originally set at the corners only and no line stakes are called out. Many subdivisions have been platted adjacent to this line. The City of Detroit Survey Section has assembled and maintained their "Cartoraphic Maps" from record plat data and field work. These maps have been relied upon for a great number of years and are considered the best assembled collection of written evidence available. To the best of my knowledge, there has never been any subsequent restoration of this line, excepting the plats which we done long ago. B. Description of corner evidence found and/or method applied in restoring or reestablishing corner. \$10.00 BED Line Common to P.C. 27 and P.C. 227 A complete analysis of this line from its southern beginnings at the Detroit River to its northern terminus has been field measured by Spalding DeDecker Associates, locating buildilines, street lines, and alley lines at various positions (see research dossier). It is my conclusion that three line orientation changes occur on this line. Points "2" and "9" establish this P.C. line between the Detroit River and Michigan Avenue. Points "2" and "9" establish this P.C. line between Michigan Avenue and Grand River Avenue. Points "2" and "9" establish this P.C. line between Grand River Avenue and the xear line of these private claims. Note that these points mark the line orientations only, not the exact point of orientation change. C. Description of monument for orner and accessories established to perpetuate locating the position of the counce: Line Common to P.C. 27 and P.C. 227 — See sketch on the back of this sheet. (F) Set 4"x 36" concrete monumen	conformance with the rules of the	he Michigan Board of Land Surveyors or	by a Decree of a Court of Law;	
A Description of original monument and accessories and/or subsequent restoration: Line Common to F.C. 27 and P.C. 227 The eastern line of F.C. 227 was originally surveyed as one tract of land in 1810. The western line of F.C. 27 was originally surveyed as two separate tracts of land, the first the year 1810 and the second most likely in 1829 (see research desaier for sketch and notes). Posts were originally set at the corners only and no line stakes are called out. Many subdivisions have been platted adjacent to this line. The City of Detroit Survey Section has assembled and maintained their "Cartographic Maps" from record plat data and field work. These maps have been relied upon for a great number of years and are considered the best assembled collection of written evidence available. To the best of my knowledge, there has never been any subsequent restoration of this line, excepting the plats which we done long ago. B. Description of comer evidence found and/or method applied in restoring or restablishing corner. \$10.00 DEED Line Common to F.C. 27 and P.C. 227 A complete analysis of this line from its southern beginnings at the Detroit River to its northern terminus has been field measured by Spalding DeDecker Associates, locating buildilines, street lines, and alley lines at various positions (see research dossier). It is m conclusion that three line orientation changes occur on this line. Points "A" and "B" establish this P.C. line between the Detroit River and Michigan Avenue. Points "E" and "F" establish this P.C. line between Michigan Avenue and Srand River Avenue. Points "E" and "B" establish this P.C. line between Grand River Avenue and the rear line of these private claims. Note that these points mark the line orientations only, not the exact point of orientation changes. C. Description of monument for corner and accessories established to perpetuale locating the position of the counce: Line Common to P.C. 27 and P.C. 227 — See sketch on the back of this sheet.
