DESCRIPTION IN DETAIL AS TO HOW CORNER WAS LOCATED AND IDENTIFIED OR RESTORED.

This corner was found during a survey in this area. Found 2" pipe presumably as established by G. D. Henning in a previous survey of record, which has been used in further corner location and subdivision of Section 4. Although a point was located some 25' NW which may have been Seeley's position for this corner, it was concluded that since positive identification is impossible, and a number of recent surveys were all based on the Henning location for purposes of section subdivision, we are led to disregard the possible Seeley corner in favor of the one identified in this record.
